3. the total value of securities in which the Fund invests more than 5% of its assets is less than 40% in aggregate;
4. the above limit of 5% may be raised to 25% in the case of bonds issued by an EU credit institution and raised to 35% for instruments issued or guaranteed by a state or public international body;
5. it does not invest more than 20% of its assets in deposits with the same credit institution;
6. the counterparty risk exposure in financial derivative instruments may not exceed 5% of the Fund's assets, which limit is increased to 10% where the counterparty is a credit institution;
7. combined exposure to a single issuer may not exceed 20% of the Fund's assets;

**The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.**

## Risk Reward Profile

### Synthetic Risk and Reward Indicator (SRRRI):

### More about this rating

The Fund SRRRI is based on price volatility over the last 5 years.

Past data used in calculating SRRRI may not be a reliable indication of future returns. This indicator is not guaranteed to remain unchanged and may shift over time. The lowest rating does not mean a risk-free investment.

### Why does this Fund have a SRRRI equal to 5?

The Fund invests globally in stocks and bonds across various industries and in different currencies and may be subject to fluctuations in value. The Fund also invests in financial derivative instruments (FDIs). Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.

The SRRRI category is therefore driven by stock, bond, FDI and currency markets movements.

The Fund offers no guarantee or capital protection.

### Are there any other particular risks?

The SRRRI category is a reasonably accurate reflection of the risk inherent in the Fund under past market and operational conditions. It does not reflect the risk to which the Fund may be exposed in the case of extraordinary future events that differ from anything the Fund experienced in the past, nor does it reflect the risk due to operational failure or other risks that are beyond the control of the Fund and affect the Fund's investments, such as legal and political risks, an unforeseeable drop in market liquidity or the failure of counterparties.

In addition, restrictions on currency convertibility, limitations of property rights or other legal and political risks may affect the Fund. Please refer to the Prospectus for a detailed explanation of all risks.
